OWNERSHIP AVAILABLE

The Opportunity

True Care System is a **live, fully operational, multi-tenant healthcare SaaS platform** — developed, deployed, and operationally validated over three years (October 2023 – July 2026) and now entering commercialization. The platform manages the complete daily operations of a licensed Pennsylvania care provider today: patient management, workforce management, scheduling, Electronic Visit Verification (EVV), billing, payroll, compliance, reporting, and mobile field operations, unified in one enterprise ecosystem. The founders have funded 100% of development — **\$1,447,000 to date** — and are now inviting strategic investors to acquire **up to 49% ownership**, with capital directed at growth rather than product creation.

A Mature, De-Risked Platform — Not a Startup Concept

Most healthcare software investments carry heavy execution risk: the product is unproven, the integrations are unbuilt, and the first customer is hypothetical. True Care System has already cleared each of those hurdles:

- **In production, serving real customers** — a licensed provider runs its entire regulated care-delivery operation on the platform every day, validating reliability under real clinical, billing, payroll, and compliance workloads.
- **Sandata EVV Production Certified** — officially registered as an approved EVV vendor organization, authorized to exchange production EVV data; a meaningful regulatory moat and prerequisite for Medicaid-funded home care markets.
- **Multi-tenant, cloud-native, and scalable** — provider-level isolation, HIPAA-oriented security architecture, native iOS/Android apps, and an AI-ready modular design built for multi-state deployment.
- **Product development is behind us** — new capital accelerates sales, implementation, and expansion instead of paying for the platform to be built.

Market Opportunity & Growth Drivers

True Care System sits at the intersection of two structurally expanding markets that sophisticated healthcare investors already know well:

- **Care-at-home demand is compounding.** Demographic aging is driving sustained growth in home care, personal care, I/DD, and long-term services and supports — and every one of those visits must be scheduled, verified (EVV), billed, and documented in compliance-heavy workflows. That is precisely the work this platform automates.
- **Behavioral health reimbursement is expanding.** Under the Mental Health Access Improvement Act, CMS now reimburses licensed professional counselors and marriage & family therapists under Medicare, and state budgets for behavioral health continue to grow. The paying-provider universe is widening on two axes at once: **more patients and more licensed professionals** (LPC, LCSW, LMFT) who need compliant practice infrastructure.
- **Regulation favors integrated platforms.** EVV mandates, HIPAA obligations, and payer documentation requirements push providers away from fragmented point tools toward unified systems — raising switching costs and rewarding platforms already certified in production.

Positioning: the macro trends are known; the scarcity is **execution-ready platforms**. True Care System is already built, certified, and operating in the exact segments these tailwinds are inflating.

Value Creation, Financial Outlook & Investment Structure

True Care System, LLC | Investor Opportunity Summary | August 2026

Five-Year Growth Plan (2027–2031)

Commercialization launches in Pennsylvania — where the platform, its provider reference site, and its Sandata certification already operate — then expands state-by-state across Sandata-supported markets. The subscription model is simple and aligned with provider growth: **\$25 per active client per month** (reference price \$30), adjusted ~5% annually.

YEAR	PROVIDERS	ACTIVE CLIENTS	ANNUALIZED REVENUE
2027	22	5,720	\$1.72M
2028	34	9,860	\$3.11M
2029	50	16,000	\$5.29M
2030	68	23,800	\$8.27M
2031	90	34,200	\$12.47M

Five-Year Cumulative Revenue	~\$30.9M
-------------------------------------	-----------------

KEY PLANNING METRICS	
Gross margin target	80%
2031 projected EBITDA	~\$5.36M
Annual break-even revenue	~\$1.38M (~4,600 clients / ~18 providers)
Introductory program	3-month provider trial → paid subscription

Annualized Subscription Revenue (\$M), 2027–2031

Management planning projection: 22 → 90 providers; 5,720 → 34,200 active clients.

Value-creation logic: recurring revenue on an already-built platform with an 80% gross-margin target — each new provider compounds ARR without proportional cost, and margin expands as fixed platform costs are absorbed.

The Investment Offer

The founders are prepared to offer **up to 49% ownership** to the right investor or strategic partner, retaining majority ownership and active leadership — a structure that keeps the people who built and operate the platform fully aligned with new capital. Beyond funding, the Company prioritizes partners who bring healthcare relationships, distribution, implementation capacity, or multi-state operating experience; such strategic contributions may shape the final investment and governance structure.

USE OF PROCEEDS (PRELIMINARY)	
Product, Engineering & Security	25%
Sales & Provider Acquisition	20%
Marketing & Brand Development	20%
Implementation, Success & Support	15%
Cloud Infrastructure & Scalability	10%
Working Capital & Organization	10%

INVESTMENT ALREADY MADE (100% FOUNDER-FUNDED)	
Founders' operational contribution (10,600 hrs)	\$1,327,000
Direct development expenses	\$120,000
Total historical investment	\$1,447,000
External / institutional capital raised	\$0 (0%)

Why True Care System, Why Now

- De-risked:** three years of development and live production use have eliminated the technology-execution risk that defines most healthcare software investments.
- Certified & regulated-market ready:** Sandata EVV Production Certification and a HIPAA-oriented architecture open Medicaid-funded home care markets that unproven platforms cannot enter.
- Perfectly timed:** aging demographics, expanding CMS/state behavioral-health reimbursement, and a growing licensed-professional workforce are enlarging the customer universe on every axis.
- Aligned and committed founders:** \$1.45M invested, majority ownership retained, leadership continuing post-investment.
- Capital-efficient entry:** investment funds go to customers and expansion — the platform is already paid for.
