Important Information

This report is intended to provide you with an analysis of your financial plan. It is based on the data and assumptions provided by you and your financial professional including but not limited to asset expected returns, volatility, and inflation assumptions. Detailed information regarding assumptions can be found on the disclosure page of this report.

The report shows comparisons of your current plan and a proposed plan. The proposed plan is a recommendation formulated by your financial professional. The report also shows comparisons of your current asset allocation and a proposed asset allocation. The proposed asset allocation is the recommendation formulated by your financial professional.

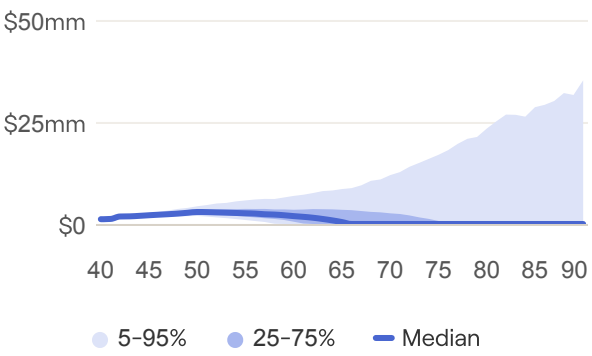

The report shows the Probability of Success of your plan using a Monte Carlo simulation calculated by running the projection 1,000 separate times. Some sequences of returns used in the Monte Carlo simulation will give you better results, and some will give you worse results. These multiple trials provide a range of possible results. RightCapital considers a trial to be "successful" if, at the end of your planning horizon, your invested assets are greater than zero. The percentage of trials that were successful is the Probability of Success of your plan, with all its underlying assumptions. Detailed disclosure regarding the calculations can be found on the disclosure page of this report.

Balance Sheet

Just like any well-run business, your personal balance sheet should always be in check. Your net worth is the difference between your assets and your liabilities. Assets are everything you own such as your home and investments, and liabilities are everything you owe such as the balance on your mortgage and other debt.

Your net worth is $10,030,993 as of 10/18/26

Assets	
Bank	$647,321

This page shows a need to increase or decrease the amounts currently represented in these asset classes of the current portfolio.

Returns presented are calculated using historical return data of indices, which serve as proxies for their respective asset classes. They are not returns of actual investments and do not include fees or operating expenses. These indices are unmanaged and the returns are shown for illustrative purposes. Please refer to sections 5 and 8.4 of the disclosure section for more information.

Please refer to sections 5 and 8.4 of the disclosure section for more information.

Allocation Path

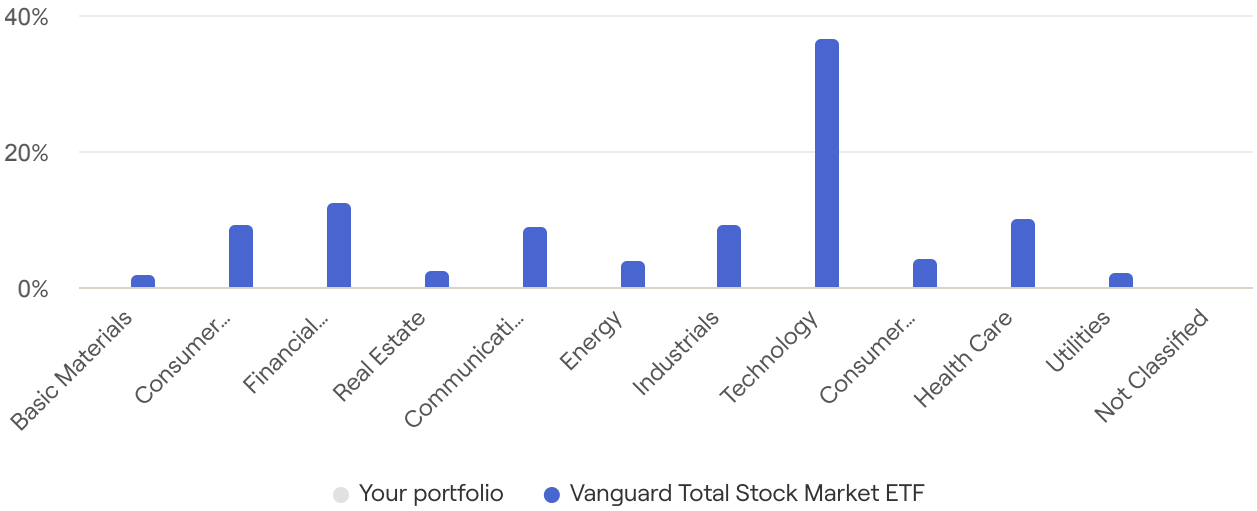

The allocation path chart can illustrate how your portfolio's asset allocation may change over time.

Equity Sector and Style

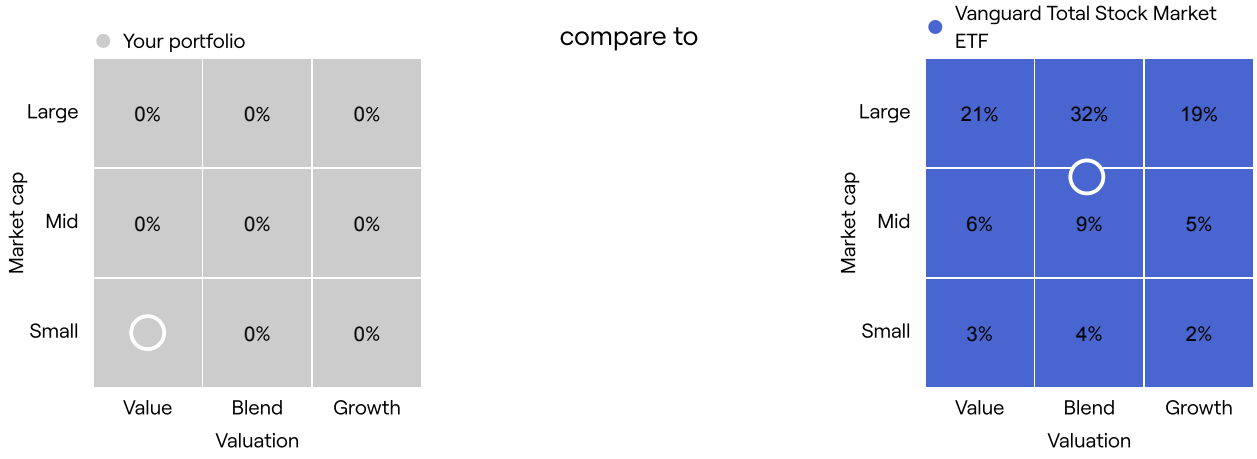

Equity investments can be categorized by sector. They are also each assigned a style based on their market cap and valuation. It is important to construct a well-diversified equity portfolio that balances risk with return, while meeting your specific financial goals. Sector and Style data is provided by Morningstar.

Equity sector comparison

Amongst the equity sectors, you are most **overweight in Not Classified and underweight Technology**.

Equity style comparison

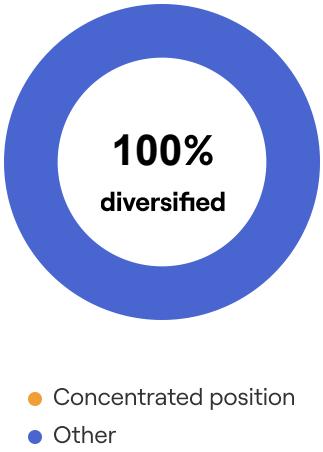

Amongst the equity styles, you are most **overweight in Small Growth and most underweight in Large Blend**.

These broad investment categories are not specific securities, funds, or investment products. The assumed rates of return of these broad categories are based on the return of indices. Please refer to section 8.4 of the disclosure section for more information.

Concentrated Position

A portfolio that is too heavy in just one security poses a substantial downside risk. This is often defined as "putting all your eggs in one basket." A concentrated position is identified as an individual stock that exceeds a certain percentage of the entire portfolio.

Diversification

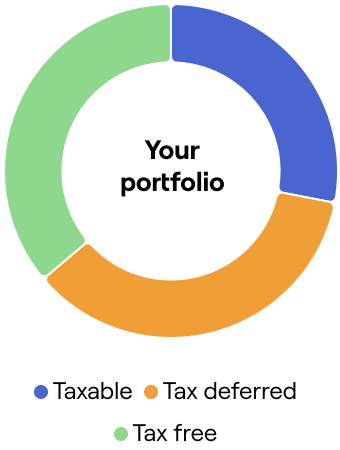

Great job! Your portfolio is not overly concentrated in any one equity or equities.

Your concentration threshold is 5% of the total portfolio.

The transaction cost of liquidation is not included in the analysis. The liquidation will also result in the loss of future earnings.

Tax Allocation

Tax deferred assets include 401(k)/403(b), IRAs and other tax deferred accounts. Tax free assets include Roth 401(k), Roth IRA, 529, HSA and other tax free accounts. The taxability of the accounts above are based on a variety of factors. Please consult a qualified tax professional to discuss your individual tax situation.

Taxable asset	Tax deferred asset	Tax free asset

Risk Tolerance Summary

Risk summary

Risk comparison

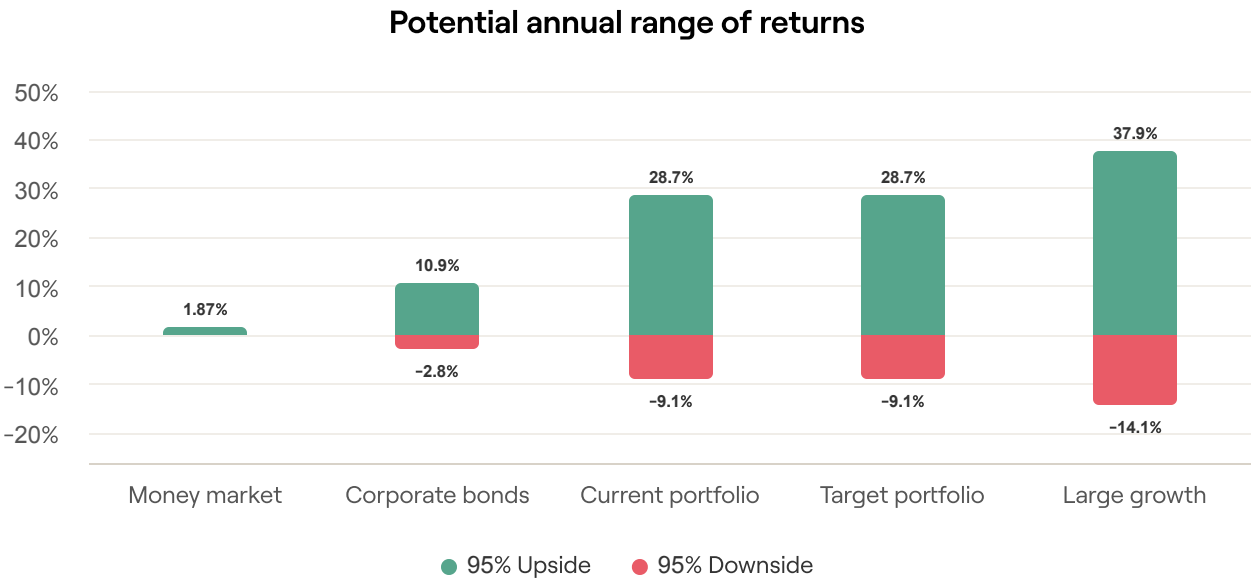

Household risk classification

The risk score ranges from 1-100, where 1 is low risk and 100 is high risk. Your advisor has evaluated your household risk score to be null.

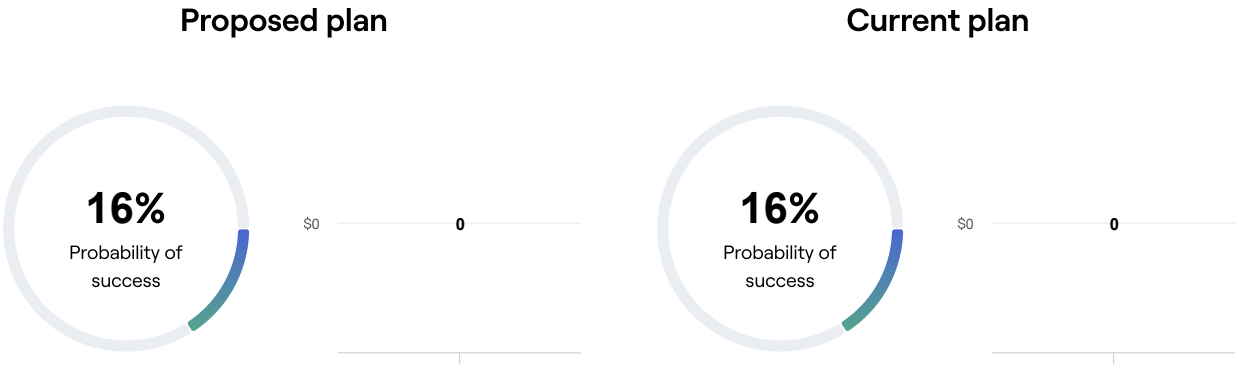

Risk Tolerance Analysis

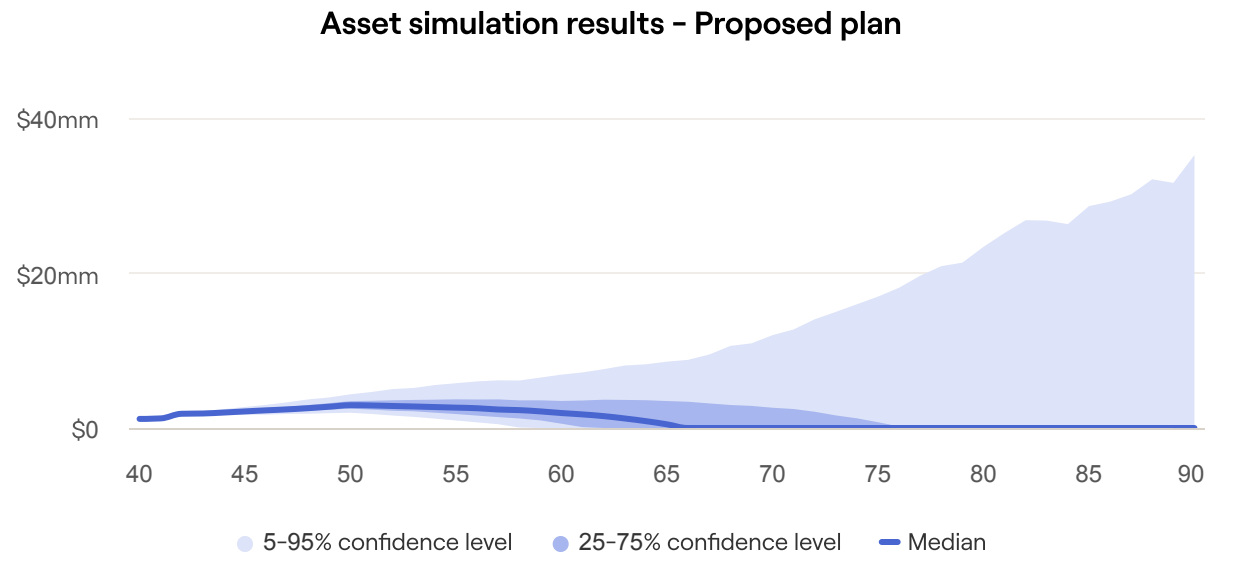

In 95% of hypothetical scenarios, annual returns are expected to be higher than the downside value. In 95% of hypothetical scenarios, annual returns are expected to be lower than the upside value. There is a 10% probability that returns will fall outside of the range. The potential annual range of returns is calculated using statistical formulas that use historical return data of indices, which serve as proxies for their respective asset classes. They are not returns of actual investments, do not include fees or operating expenses, and are not guarantees of future results. Please refer to sections 5 and 8.4 of the disclosure section for more information.

Monte Carlo Analysis

Use of a detailed retirement analysis tool is important to help determine whether you are on track for a successful retirement. Monte Carlo simulations, stress tests, and viewing specific scenarios can help you evaluate your retirement plans and see the impact of potential changes.

This section of the report displays the results of Monte Carlo simulations run on the current and proposed plans. The results are derived from 1000 simulations and the specified retirement cash flows. The chart of probability of success represents the overall likelihood of success in both the current and proposed plan.

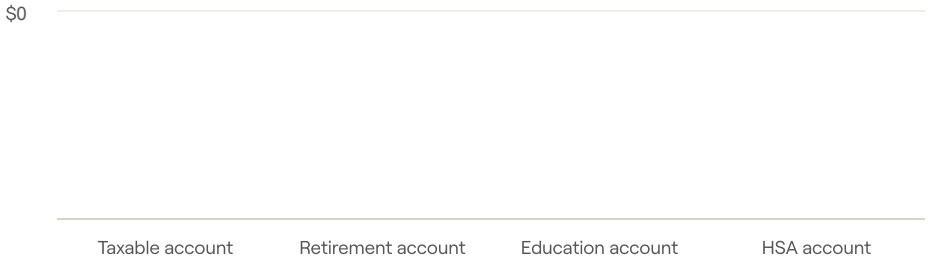

IMPORTANT: The projections or other information generated by RightCapital regarding the likelihood of various investment outcomes are hypothetical in nature, do not reflect actual investment results and are not guarantees of future results. Results are based on return and volatility assumptions from a number of market indices shown in disclosure sections 5, 6 and 8.4. Fees and expenses are not included, and thus, are excluded, including, but not limited to, fund fees, account fees, product fees and advisor fees. Inclusion of those fees results in lower returns, which would affect the probability of achieving any particular outcome. Results may vary with each use and over time. The analysis must be reviewed in conjunction with assumptions, limitations and methodologies in the disclosure section. This report is not complete without the accompanying disclosure page.

Stress Test

Even the best retirement plans will be exposed to various risks. These risks can include market volatility, taxation, low Social Security payments, longevity, inflation, and short and long-term health care expenses. It is important to both anticipate and plan for such risks. Doing so can substantially increase your probability of success.

Stress Test results are based on the following assumptions:

Equity markets drop immediately by	20%	Tax expense will be higher by	20%
Social Security will be reduced by	20%	You will live	5 yrs. longer
Inflation will be higher by	1%	Health care cost will be higher by	20%
Asset return will be lower by	1%		

This section of the report displays the results of Monte Carlo simulations run on various stressed tests. The results are derived from 1000 simulations and the specified retirement cash flows. The probability of success represents the overall likelihood of success in various stress tests.

IMPORTANT: The projections or other information generated by RightCapital regarding the likelihood of various investment outcomes are hypothetical in nature, do not reflect actual investment results and are not guarantees of future results. Results are based on return and volatility assumptions from a number of market indices shown in disclosure sections 5, 6 and 8.4. Health Care – Medicare Options (Vanessa)

Medicare enrollment period

Your enrollment period

Vanessa should talk to the group benefit administrator and ask about signing up for Medicare 3 months before Vanessa's 65th birthday. Vanessa will be auto enrolled in Part A and B. Vanessa can consider declining Part A, B coverage, delaying Medicare enrollment, and continuing to use Group plan coverage. Vanessa needs to enroll in Medicare when Vanessa loses Group plan coverage.

Start enrollment

To enroll in Medicare part A and B: www.ssa.gov

To enroll in MediGap, Medicare Advantage and Medicare Part D, you need to compare plans from private insurance companies. Start at www.medicare.gov

Health Care – Medicare Options

Medicare tips

Scenario	Tip
I'm turning 65	Medicare enrollment is NOT automatic
I have group retiree benefit or COBRA	You still need Medicare
I missed my enrollment period	You have a LIFETIME penalty of higher premiums. You are likely to have months of a coverage gap
I enrolled in Medicare	You cannot contribute to an HSA
I enrolled in Medicare Advantage	You don't need a MediGap policy
What's my total health care cost?	Varying by plan, premium plus out of pocket expenses range from $5,000 to $8,000 per year.

Health Care – Preferences (Vanessa)

Medicare preferences

Preferences

Location

I spend most of my time at home and visit in-network Dr. in my area

Health

I'm healthy and can work with deductible/copay/coinsurance for lower premiums

Risk

I prefer more predictable cost with an out of pocket limit

Enrollment

Social Security

I will have received retirement benefits by age 65

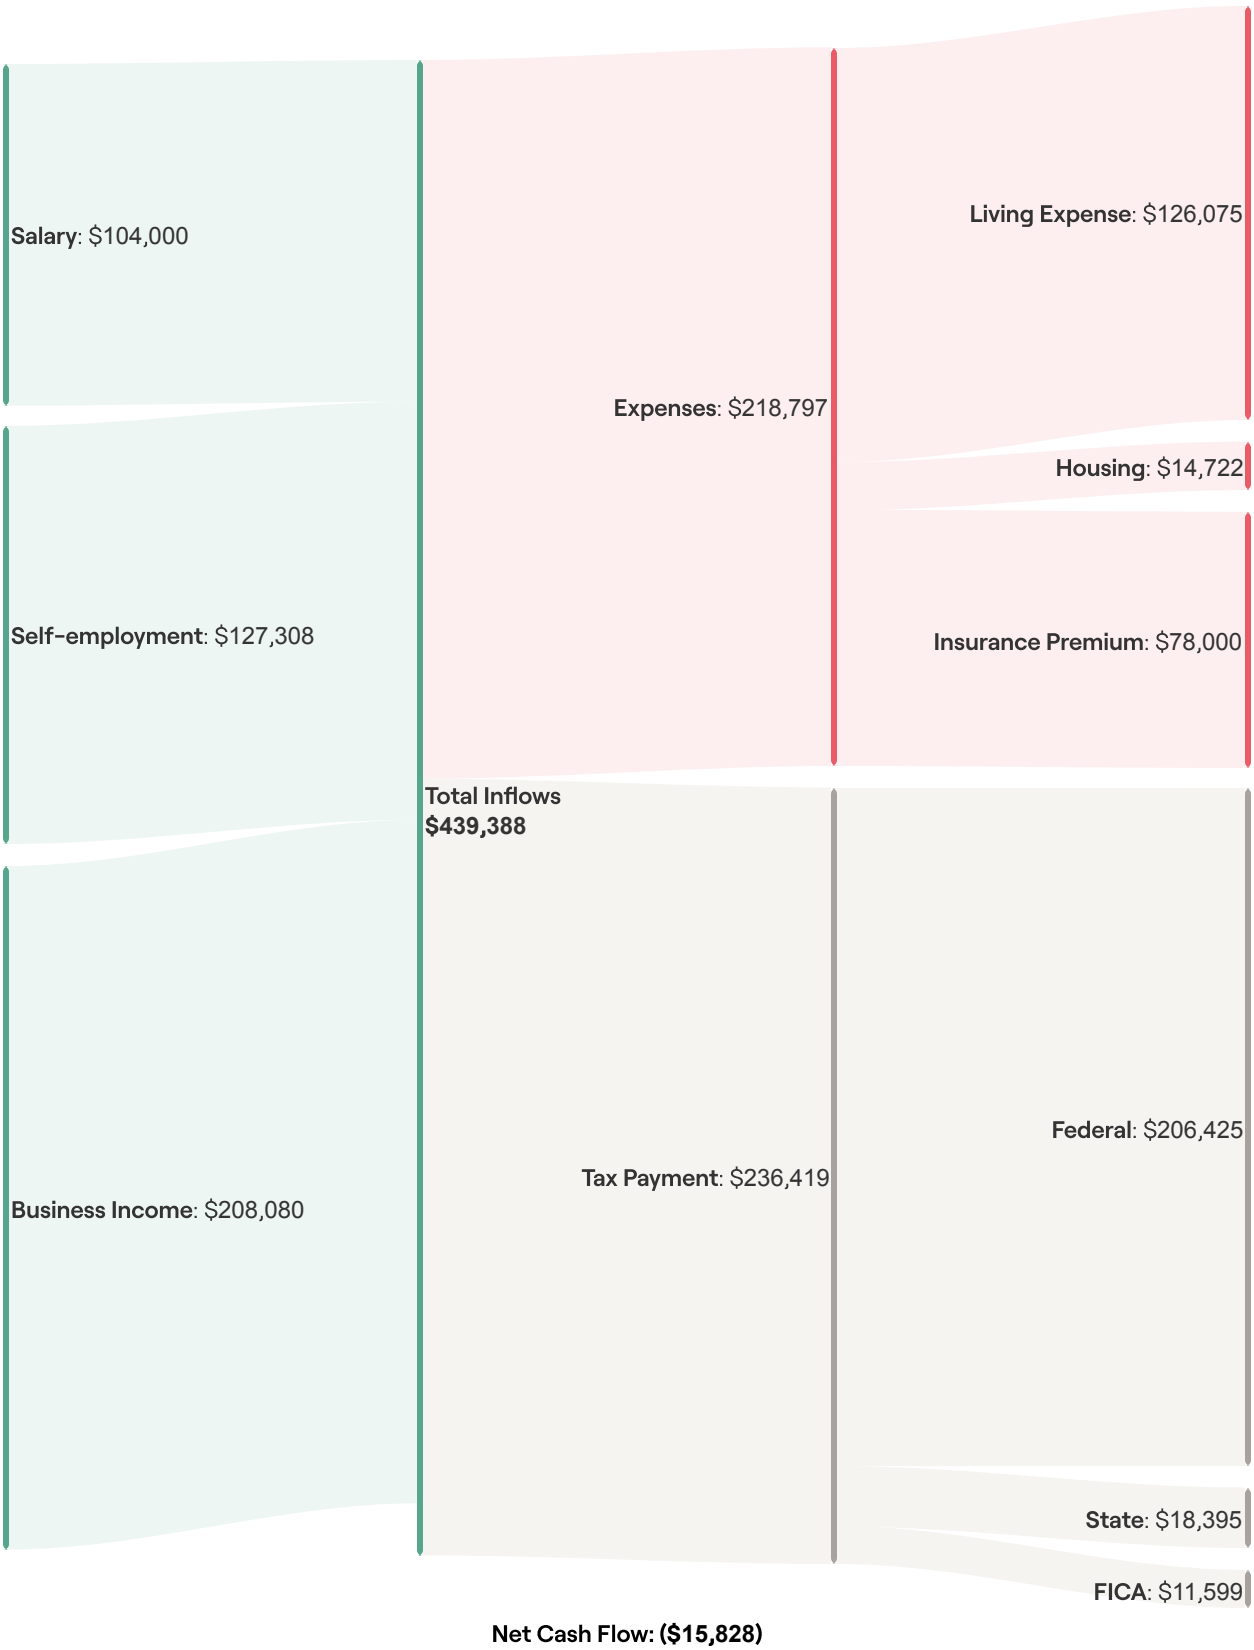

Group plan coverage at age 65

I have group coverage from me/spouse. Plan covers more than 20 employees

Cash Flows - Proposed Plan

Life Insurance

The need for life insurance is analyzed by projecting future cash flows for an individual's survivors. This generates a proposed life insurance coverage level that helps ensure the survivors have sufficient assets to reach the end of the planning horizon.

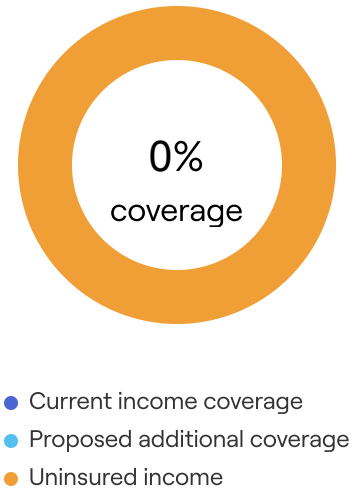

Current debt	**$0**
Luke's College Goal	**$30,990**
Monthly expenses	**$0**
Expense ends	**2027**

Current asset	**$1,173,073**
Life insurance needs	**$88,894**
Current life insurance	**$4,098,153**
Proposed additional life insurance	**$0**

Disability Insurance Analysis

According to the Social Security Administration, the chance of becoming disabled before you retire is 1 in 4 - and for most people, disability will result in a lower living standard due to the loss of income. Having a disability insurance policy can replace lost earnings.

Long-Term Care Insurance Analysis

U.S. Department of Health and Human Services indicates that 70% of people turning age 65 can expect to use some form of long-term care during their lives. Long-term care insurance may help you offset some of the cost.

LTC's impact on your invested assets

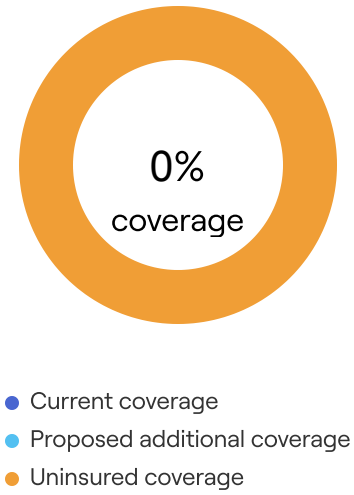

Proposed coverage results in **$0 higher** ending invested assets

	Vanessa's additional coverage
LTC insurance	
Current long term care daily coverage	$0
Proposed additional daily coverage	$0
Proposed benefit period	2 years
Proposed elimination period	None
Proposed inflation adjustment	0%
Proposed inflation type	Compound
Proposed annual premium	$0

Long-Term Care Insurance Analysis

Vanessa's total LTC cost is $1,707,514

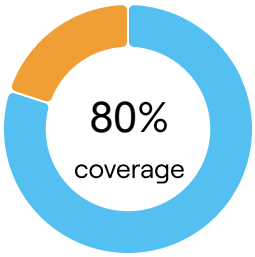

The LTC cost is calculated based on estimated LTC cost today adjusted by health inflation assumption. The LTC cost today used is documented in the Summary of User Input page. The health inflation assumption used is documented in section 7 of the disclosure page.

Property and Casualty Insurance - Homeowner

Liabilities associated with your home, auto, or other incidents can have a significant negative impact on your finances. Ensure that your insurance coverage is up to date and sufficient.

Tax Strategies - Action items

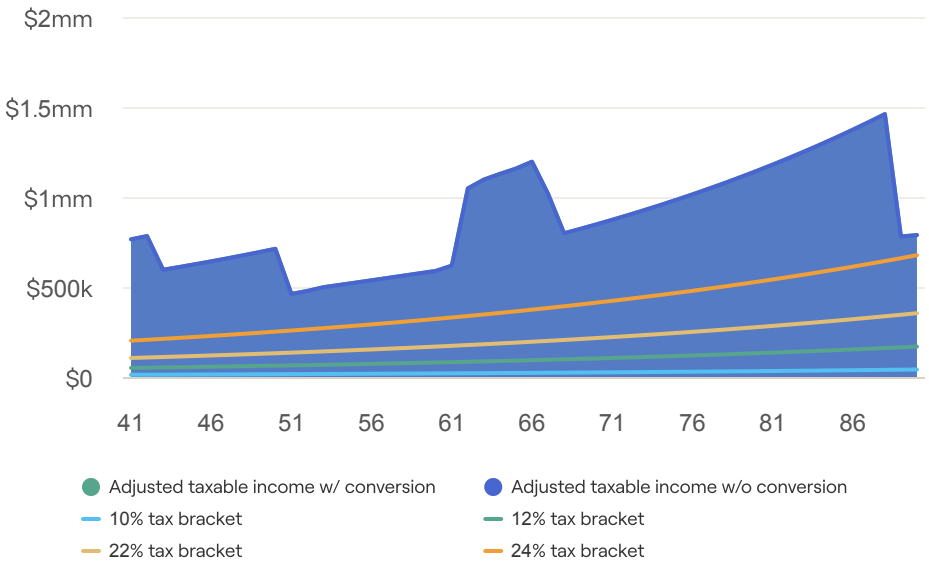

Proposed tax strategy

	Proposed strategy	Reference strategy
Asset location		
Equity allocation	Pro-rata	Pro-rata
Asset withdrawal		
Withdrawal sequence	Taxable, tax-deferred, tax-free	Taxable, tax-deferred, tax-free
Conversions / distributions		
Type	Convert to Roth	
Conversion target	Ordinary income tax bracket	
Fill up the tax bracket	None	
Conversion from	All tax-deferred	
Estimated terminal tax rate	15%	15%

Conversion refers to a process converting assets in a Traditional IRA, 401(k), or other tax-deferred account to a Roth IRA account. It is important to evaluate whether a conversion is appropriate for your specific financial circumstances and evaluate any consequences and tax implications of this strategy. Tax Cuts and Jobs Act repeals the rules permitting recharacterizations of Roth conversions, effective starting in 2018.

Disclosure

1 **No Warranties.** RightCapital makes no warranties, expressed or implied, as to accuracy, completeness, or results obtained from any information on www.rightcapital.com (the "Platform"). The Platform uses simplified assumptions derived and/or obtained from historical data that are used to create assumptions about potential investment returns.

2 **Advice.** RIGHTCAPITAL DOES NOT PROVIDE LEGAL, TAX, ACCOUNTING, INVESTMENT OR FINANCIAL ADVICE. RIGHTCAPITAL DOES NOT PROVIDE RECOMMENDATIONS FOR ANY PRODUCTS OR SECURITIES. Your financial professional may not provide tax or legal advice. The appropriate professionals should be consulted on all legal and accounting matters prior to or in conjunction with implementation of any strategy. Use prospectus for any discussions about securities.

3 **Data** provided by you or your financial professional for your assets, liabilities, goals, accounts, and other assumptions are key inputs for the calculations at RightCapital. The information should be reviewed periodically and updated whenever there is a change in information or circumstances.

4 **Monte Carlo Simulation methodology.** RightCapital generated Monte Carlo simulations calculating the results of your plan by running the projection 1000 times. Some sequences of returns will give you better results, and some will give you worse results. These multiple trials provide a range of possible results. RightCapital considers a trial to be "successful" if at the end of the planning horizon your invested assets are greater than zero. The percentage of trials that were successful is the Probability of Success of your plan, with all its underlying assumptions.

5 **Asset classes used in Monte Carlo simulation** RightCapital uses only a few asset classes. The default return and volatility assumptions of the asset classes are estimated based on the historical return data of indices, which serve as proxies for their respective asset classes. They are not returns of actual investments. The historical return data used to derive returns for all asset classes are:

> Large Growth, Large Value and Other: S&P 500 Total Return Index - 12/1975 — 12/2025
> Mid Cap: Russell Midcap Index - 12/1995 — 12/2025
> Small Cap: Russell 2000 Index - 12/1980 — 12/2025
> International Equities: MSCI EAFE Index - 12/1975 — 12/2025
> Emerging Markets: MSCI Emerging Market Index - 12/1987 — 12/2025
> Real Estate: MSCI US REIT Index - 12/2009 — 12/2025
> Government: 10 Year Treasury Bond - 12/1999 — 12/2025
> Municipal: Bloomberg Municipal Bond Index - 12/1999 — 12/2025
> Corporate and International Bonds: Bloomberg US Aggregate Bond Index - 12/1999 — 12/2025
> High Yield: ICE BofA US High Yield Index - 12/1999 — 12/2025
> Cash: 3 Month Treasury Bill - 12/1999 — 12/2025

Note: The S&P500 Total Return Index is made up of both large cap growth and large cap value stocks. This index return and volatility data is used for both large cap growth and large cap value asset classes in the RightCapital system as it is an appropriate benchmark for both. RightCapital uses the S&P500 total return index as the best proxy for any unclassified assets labeled as 'Other'

6 **Return and volatility assumptions used in Monte Carlo simulations**

Asset Class	Total Return	Volatility
Large Growth	11.93%	15.76%
Large Value	11.93%	15.76%
Mid Cap	10.48%	17.12%
Small Cap	10.41%	19.69%
International Equities	9.63%	16.55%
Emerging Markets	10.07%	21.63%

Asset Class	Total Return	Volatility
Real Estate	8.92%	17.24%
Government	3.82%	7.38%
Municipal	4.22%	4.65%
Corporate	4.06%	4.17%
High Yield	6.49%	8.89%
International Bonds	4.06%	4.17%

Asset Class	Total Return	Volatility
Cash	1.87%	0.54%
Other	11.93%	15.76%

7 **Tax and Inflation assumptions used in Monte Carlo simulations** Starting federal and state standard deductions, exemptions and the tax brackets used in projections are as of 2026. The following inflation assumptions are used in the projection: General inflation 2.5%; Education inflation 5%; Tax inflation 2.5%; Social Security inflation 2.5%; Health inflation: 5%

8 **Assumption and calculation limitations of Monte Carlo Simulations**

8.1 **Your resources and goals may be different from the estimates that you provided:** The report is intended to help you in making decisions on your financial future based, in part, on information that you have provided and reviewed including, but not limited to, your age, income, assets, liabilities, anticipated expenses and retirement age. Some of this information may change in unanticipated ways in the future and those changes may make this RightCapital projection less useful.

8.2 **Inherent limitations in RightCapital financial model results:** Investment outcomes in the real world are the results of a near infinite set of variables, few of which can be accurately anticipated. Any financial model, such as RightCapital, can only consider a small subset of the factors that may affect investment outcomes and the ability to accurately anticipate those few factors is limited. For these reasons, investors should understand that the calculations made in this report are hypothetical, do not reflect actual investment results, and are not guarantees of future results.

8.3 **Results may vary with each use and over time:** The results presented in this report are not predictions of actual results. Actual results may vary to a material degree due to external factors

beyond the scope and control of this report. As investment returns, inflation, taxes, and other economic conditions vary from the assumptions, your actual results will vary from those presented in RightCapital. Small changes in these inputs and assumptions may have a significant impact on the results.

8.4 **RightCapital considers investments in only a few Broad Investment Categories:** RightCapital utilizes U.S. Large Growth, U.S. Large Value, U.S. Mid Cap, U.S. Small Cap, Real Estate, International Equities, Emerging Markets Equity, U.S. Government, U.S. Corporate, U.S. High Yield, International Bonds and Cash. These broad investment categories are not specific securities, funds, or investment products. The assumed rates of return of these broad categories are based on the returns of indices. These indices do not include fees or operating expenses and are not available for investment. These indices are unmanaged and the returns are shown for illustrative purpose. It important to note that the broad categories that are used are not comprehensive and other investments that are not considered may have characteristics that are similar or superior to the categories that are used in RightCapital.

8.4.1 **Investment Risk:** Clients and prospective clients should be prepared to bear investment loss including loss of original principal. Clients should assess their tolerance for risk with their financial professional and update when a change in financial status occurs. Investments are subject to many risks depending on the asset class, including but not limited to: Large Growth, Large Value, Mid Cap, Small Cap, Real Estate: Either the stock market as a whole, or the value of an individual company, may go down resulting in a decrease in the value of client investments. Common stocks are susceptible to general stock market fluctuations and to volatile increases and decreases in value as market confidence in and perceptions of their issuers change. If you held common stock, or common stock equivalents, of any given issuer, you would generally be exposed to greater risk than if you held preferred stocks and debt obligations of the issuer. Small cap stocks may be subject to risks such as but not limited to volatility, lack of available information and liquidity due to low trading volume. International Equities, Emerging Markets: Foreign investments may carry risks associated with investing outside the United States, such as currency fluctuation, economic or financial instability, lack of timely or reliable financial information or unfavorable political or legal developments. Those risks are increased for investments in emerging markets. Foreign securities can be more volatile than domestic (U.S.) securities. Government, Municipal, Corporate, High Yield, International Bonds: Investments in fixed income are subject to various risks including changes in interest rates, credit quality, inflation risk, market valuations, prepayments, corporate events, tax ramifications and other factors. Investing in securities involves risk of loss. Further, depending on the different types of investments there may be varying degrees of risk.

8.5 **Insurance, Annuities and other related calculations.** RightCapital may include Life insurance, annuity or other products in the calculation. The return or returns of any such life insurance product, annuity or other product, as may be included in the calculation, are hypothetical and shall not be used as proxy, replacement for nor construed as actual performance of the product or to predict or project investment results of those products. Product fees, expenses and detailed features may not be completely included and modeled in the calculation. This report should not be construed as an insurance policy application or pre-qualification.

8.6 **Fees and expenses:** The portfolio returns assume that the portfolio is rebalanced on an annual basis to reflect the target allocation. No portfolio rebalancing costs are deducted from the

portfolio value. Fees and expenses are not included, and thus, are excluded, including, but not limited to, fund fees, account fees, product fees and advisor fee. Inclusion of those fees results in lower returns, which would affect the probability of achieving any particular outcome.

8.7 **Taxes:** RightCapital includes limited accounting for taxes. RightCapital calculates taxes based on your input. RightCapital estimates federal, state and local taxes based on current laws with simplified deduction, exemption, and tax bracket parameters of the current year. In the projection, tax parameters are adjusted by an inflation assumption provided by you or your financial professional. Future tax laws may be significantly different than current tax laws and may result in higher or lower taxes due than what are reflected within this report. Roth IRA distribution are tax free if made 5 years after the initial contribution to the plan and you are over 59 1/2. Before investing in a 529 plan, consider whether your state offers a 529 plan that provides residents with favorable state tax benefits. RightCapital includes limited accounting for Federal and State Estate Tax with simplified deduction, exemption, and tax bracket parameters of the current year.

8.8 **Current Dollars and Future Dollars:** The results of RightCapital calculations are in future dollars. To help you compare dollar amounts in different years, results can also be expressed in current dollars by discounting the future dollars by the inflation rate you or your financial professional provides.

8.9 **Current allocation and target allocation:** Current allocation is the allocation based on the current portfolio holdings entered in the system as well as asset classification data from Morningstar. The target allocation is the allocation recommended by your financial professional.

8.10 **Current plan and proposed plan:** Current plan is the plan based on the information you and your financial professional input in the profile section. Proposed plan is the plan recommended by your financial professional, with the plan details as shown in the retirement analysis section.

9 **Liquidation of holdings:** this report may include liquidation of holdings, recommended by your financial professional. The transaction cost of liquidation is not included in the analysis. The liquidation will also result in the loss of future earnings.
