

Introducing Wealth Advisory Now

Independent · Fiduciary · Planning-first — built for owners, professionals and executives in the second half of their careers.

POST COPY — READY TO PASTE

Most of us in the Anderson network learned how to build a business. Very few of us were ever taught how to manage the wealth that business creates.

That is why my partners and I built **Wealth Advisory Now (WAN)** — an independent, fiduciary registered investment adviser for business owners, professionals and executives in the second half of their careers.

How we are different:

- **Fiduciary, always.** As an RIA we are obligated to put your interests first. We are not a product shop.
- **Planning first, products last.** Every relationship starts with a full financial plan — Monte Carlo projections, tax and Social Security modeling, retirement income — before any investment is recommended.
- **Transparent, flat planning fees.** Priced by complexity, disclosed up front, independent of how much you have.
- **Credentialed partners.** Series 65 investment adviser representatives with the Certified Retirement Counselor (CRC) designation.

What we do: retirement income & Roth conversion strategy · investment & portfolio review · tax-efficient withdrawals · equity compensation planning · estate coordination · insurance & risk review · business-owner planning (entity structure, retirement plan design, exit & succession).

If you are in your 40s or 50s, running a business or sitting on equity comp, and nobody is looking at the whole picture — let's talk. Message me for a complimentary portfolio and blind-spot review.

One fiduciary team. Every part of your financial life.

Each service is available on its own or bundled into a flat-fee planning package sized to your complexity.

Retirement income

Withdrawal sequencing, Social Security timing, pension & Roth conversion roadmap.

Investment & portfolio

Portfolio X-ray, risk assessment, fee analysis, target allocation and rebalancing.

Tax-efficient strategy

Asset location, bracket management, RMD projections, CPA coordination.

Equity compensation

RSU, ISO & NQSO exercise strategy, tax modeling, concentration risk.

Estate coordination

Beneficiary & titling audit, trust coordination with your attorney.

Insurance & risk

Life, disability, LTC and liability coverage-gap analysis — before any product.

Business-owner planning

Entity & compensation structure, 401(k)/SEP/defined benefit design, exit & succession.

Goals & next generation

Education funding, early retirement, major purchases, legacy for your children.

What makes us different

Fiduciary standard

A registered investment adviser, legally obligated to act in your best interest. Advice is not driven by what a product pays.

Planning before products

A comprehensive plan — Monte Carlo, tax projections, Social Security optimization — comes first. Recommendations follow the plan, not the other way round.

Transparent flat fees

Three planning tiers priced by complexity, not by assets. Quarterly reviews included; you know the fee before we start.
