MATURITY NOTIFICATION LETTER

Our records indicate that you have at least one Structured Capital Strategies Segment maturing shortly. You may have given us maturity instructions. If not, and you do not send us maturity instructions by the Segment Maturity Date, the maturing amount will roll over to a new Segment with the same index, buffer, and duration. However, if you have given us no instructions for the upcoming maturing Segment, but all of the instructions you've given us for other Segment Types are to invest maturing amounts according to your allocations on file for new contributions, we will invest the upcoming maturing Segment according to your allocations on file for new contributions also. Performance Cap Rates are announced two weeks before the Segment Start Date. For your convenience, Performance Cap Rates are published on-line at www.equitable.com/scs to help you make an informed decision.

A variable and index-linked deferred annuity contract such as Structured Capital Strategies is a long-term financial product designed for retirement purposes. Structured Capital Strategies provides a capped rate of return to the performance of a specified index with some downside protection. Because the downside protection is partial, your contract's value is only protected from some negative returns. There is a risk of substantial loss of principal because you agree to absorb all losses to the extent that they exceed the protection provided. There are fees and charges associated with Structured Capital Strategies, which includes a contract fee that covers administrative expenses, sales expenses and certain expense risks.

By choosing paperless delivery of this notice, you will be teaming with us to help reduce our carbon footprint and provide future generations with a more sustainable outlook. You can enroll in paperless delivery of these notices and other documents by visiting www.equitable.com.
