Your Summary of Administrative/Individual Expenses

This Period
04/01/2026 - 06/30/2026

Year-to-Date
01/01/2026 - 06/30/2026

Your Administrative Expenses

Administrative Expenses may include expenses relating to legal, accounting and recordkeeping services performed for the Plan. See your Annual Participant Notice and Program Summary Document for detailed descriptions of the fees listed below. Both documents are available at www.equitable.com. These charges are listed below:

ASSET CHARGE	-\$335.75	-\$651.63
Total	-\$335.75	-\$651.63
Grand total	-\$335.75	-\$651.63

In addition to the fees and expenses shown on this statement, if any, some of the Plan's administrative expenses for the preceding quarter were paid from the Total Annual Operating Expenses from one or more of the Plan's designated investment alternatives (e.g. through revenue sharing arrangements, Rule 12b-1 fees, sub-transfer agent fees, etc).

Administrative/Individual Expenses do not include the Total Annual Operating Expenses, which are incorporated in the calculation of your Net Change but are not otherwise itemized on this account statement.

*Average Annual Total Returns refers to the average percentage return an investment earns each year over a specified period.

**Money coming into your account is invested as shown above. This represents your contribution allocation elections as of the statement date.

¹ Notes on Personal Rate of Return

Performance Notes

- Your personal rate of return shows how your retirement account performed over a specific time. This section provides you with information, which can help you track your long-term progress toward retirement savings goals.
- These rates of return are based on the amount and the timing of your cash flow. A rate of return could vary by using other calculation methods. Past performance does not guarantee future results. Results are not annualized.

MONTHLY INCOME ILLUSTRATION

This projection provides you with information about how much monthly income you could collect at retirement based on your current account balance, if you were to receive payments in one of the following two forms:

1. Single Life Annuity

An arrangement that pays you a fixed amount of money each month for the rest of your life. Following your death, no further payments would be made to your spouse or heirs.

2. Qualified Joint and 100% Survivor Annuity

An arrangement that pays you and your spouse a fixed monthly payment for the rest of your joint lives. In addition, after your death, this type of annuity would continue to provide the same fixed monthly payment to your surviving spouse for their life.

An annuity with a lower survivor percentage may be available, and reducing the survivor percentage (below 100%) would increase monthly payments during your lifetime, but would decrease what your surviving spouse would receive after your death.

The estimated monthly payments in this statement are for illustrative purposes only; they are not a guarantee. Having this information now may help you plan how much money to save for your retirement.

The Estimated Monthly Payments:

- Assume that your account balance is 100% vested and, if you have taken a loan from the plan and you are not in default, the loan has been fully repaid.
- Assume that payments begin 06/30/2026 and that you are 67 on this date. Monthly payments beginning at a younger age would be lower than shown since payments would be made over more years. Monthly payments beginning at an older age would be higher than shown since they would be made over fewer years.
- Are based on an interest rate of 4.47%, which is the 10-year constant maturity U.S. Treasury securities yield rate as of 06/01/2026, as required by federal regulations. This rate fluctuates based on market conditions. The lower the interest rate, the smaller your monthly payment will be, and the higher the interest rate, the larger your monthly payment will be.
- Are based on how long you and a spouse, who is assumed to be your age, are expected to live. For this purpose, federal regulations require that your life expectancy be estimated using gender neutral mortality assumptions established by the Internal Revenue Service.
- Are the same whether you are male or female. This is required for annuities payable from an employer's plan. However, the same amount paid for an annuity available outside of an employer's plan may provide a larger monthly payment for males than for females since females are expected to live longer.
- Are based on prevailing market conditions and other assumptions required under federal regulations. If you decide to purchase an annuity, the actual payments you receive will depend on a number of factors and may vary substantially from the estimated monthly payments in this statement. For example, your actual age at retirement, your actual account balance (reflecting future investment gains and losses, contributions, distributions, and fees), and the market conditions at the time of purchase will affect your actual payment amounts.

The estimated monthly payments for a qualified joint and survivor annuity in this statement assume that you are married with a spouse who is the same age as you (even if you do not currently have a spouse, or if you have a spouse who is a different age). If your spouse is younger, monthly payments would be lower than shown since they would be expected to be paid over more years. If your spouse is older, monthly payments would be higher than shown since they would be expected to be paid over fewer years.

Your Account Balance
as of 06/30/2026

\$372,922.50

1. Single Life Annuity

You could receive
\$2,484.24 per month starting at retirement

2. Qualified Joint and 100% Survivor Annuity

You could receive
\$2,121.33 per month starting at retirement

Your spouse could receive
\$2,121.33 per month following your death

Unlike Social Security payments, the estimated monthly payments in this statement do not increase each year with a cost-of-living adjustment. Therefore, as prices increase over time, the fixed monthly payments will buy fewer goods and services.
