

Over all Objectives

Use the information from part 1 to part 5 below to create a concrete plan for Part 6.

Part 1: Who we are

Pinnacle Planning is the advanced division of M&M Wealth Associates, built for business owners and entrepreneurs who demand clarity, control, and thoughtful planning. It is not a product shop. It is not a generalist practice. It is a coordinated, fiduciary-standard planning experience that addresses the full financial picture of a business owner, from tax strategy and insurance to retirement, succession, and legacy.

Pinnacle Planning sits within a three-lane business structure:

- **M&M Wealth Associates:** The primary brand and marketing engine. Educates, sells commissionable products (life insurance, IULs, annuities), and quarterbackes the full financial team. The largest audience and top of the funnel for everything.
- **Pinnacle Planning:** The advanced division. Targets business owners specifically. Entry point is tax savings and insurance solutions. Feeds into Wealth Advisory Now for ongoing investment management.
- **Wealth Advisory Now:** The registered investment advisor (RIA) and fiduciary planning arm. Handles investment management, AUM relationships, and comprehensive financial planning under the Series 65 license. Fiduciary standard applies here exclusively.

Pinnacle Planning markets under the Pinnacle Planning and M&M Wealth Associates brands. Clients are introduced to Wealth Advisory Now naturally as the relationship deepens, not as an upfront pitch. Right Capital serves as the bridge, a comprehensive financial plan that demonstrates value and makes the transition to ongoing advisory management a natural next step.

All of the partners are Series 65 holder, with certification from **Certified Retirement Counselor (CRC)** as financial professional who has specialized knowledge in retirement planning and has met the requirements to earn this designation.

Part 2: Our Products and Services

What Pinnacle Planning Does

Pinnacle Planning delivers a coordinated, comprehensive financial planning experience across five domains:

- **Tax Savings and Strategy:** Defined benefit plans, Section 199A deductions, accelerated depreciation, compensation structuring, and proactive year-round tax planning coordinated with the client's CPA.
- **Insurance Solutions:** Key man insurance, buy-sell agreements funded by life insurance, premium financing (Kaizen, Trizen), split dollar regime, IULs, annuities, and standard life insurance through M&M Wealth Associates.
- **Retirement Planning:** Defined benefit plans, 401k solutions (via Wealth Advisory Now or network partners such as Simplicity Workspace), retirement income strategy, and distribution planning.
- **Business Owner Benefits:** Cafeteria plans (referred to network specialists), employee benefit design, and executive planning.
- **Legacy and Estate Planning:** Trust structures, family governance, tax-efficient wealth transfer, estate liquidity via life insurance, and coordination with estate attorneys.
- **Investment Management:** Handled through Wealth Advisory Now as the relationship matures. AUM model, fiduciary standard, Right Capital platfo
-

Proprietary Solutions Others Cannot Offer

Pinnacle Planning brings solutions that most business owners have never been shown and cannot implement on their own:

- Defined benefit plans that can shelter \$100K to \$300K+ of income annually
- Premium financing strategies (Kaizen, Trizen) for high-income owners
- Split dollar regime and executive benefit structures
- Buy-sell agreements and key man coverage that protect the business and the partnership
- Right Capital financial planning platform with Monte Carlo simulation, Social Security optimization, and 50-page comprehensive reportsrm.

What Pinnacle Planning Does Not Do

Exclusivity and focus are core to the Pinnacle Planning brand. The following are explicitly outside scope:

- Commercial lending or financing referral programs
- Real estate brokerage or transaction referrals
- General financial planning for W2 employees or non-business owners (refer to M&M)
- Chasing every revenue opportunity that walks through the door

Saying no to the wrong opportunities is what makes Pinnacle Planning the right choice for the right clients. Watering down the offering waters down the brand.

The Quarterback Model

Pinnacle Planning does not replace the client's CPA, estate attorney, or other professionals. It coordinates them. Matthew and Durendal serve as the central hub of the client's financial life, connecting and aligning every professional on the team so nothing falls through the cracks. Most business owners have a CPA who files their taxes and an insurance agent who sold them a policy. Nobody is looking at the full picture. Pinnacle Planning is the first team that does.

Pinnacle Planning generates revenue across three streams:

- Commissions: Life insurance, IULs, annuities, key man, buy-sell, and premium financing products sold through M&M Wealth Associates and FFS (First Financial Security). Paid via 1099 on closed insurance business.
- Flat Fee Financial Planning: One-time or annual fee ranging from \$500 to \$3,000 for comprehensive financial plan delivery via Right Capital. Does not include asset management.
- AUM (Assets Under Management): All-inclusive model through Wealth Advisory Now. Full financial planning plus active portfolio management. One relationship, fully managed. Introduced after the planning relationship is established.

Part 3: Our Customers

Pinnacle Planning is not for everyone. The goal is to attract the clients we want, not simply the clients we can help. This distinction matters because the right clients make the business sustainable, the wrong clients make it chaotic.

The Ideal Client

Without exception, the target is a business owner or entrepreneur. Not a W2 employee. Not a C-suite executive without a business. The one exception is a 1099 specialist with sufficient income and financial complexity, such as an independent physician, dentist, or consultant, who functions economically like a business owner.

The ideal client profile:

Attribute	Description
Business Type	Business owner or entrepreneur with employees or 1099 structure. Mom and pop operations, solopreneurs, partnerships, LLC, S-Corp, C-Corp.
Business Revenue	\$500K or more in gross revenue. Not necessarily profit, but the business must be operating profitably.
Personal Income	\$250K to \$1M+
Employees	1 to 10 (primary target). Open to larger if complexity warrants.
Age	40 to 60
Advisor Relationship	No current advisor relationship, or unsatisfied with existing advisor. Does not have someone they fully trust.
Financial Savvy	Savvy or unsavvy. What matters is that they are too busy to handle this on their own and they recognize they need a team.
Mindset	Coachable. Recognizes they need help. Willing to be guided. Values time over money.
Core Pain	Taxes, feeling financially lost, no coordinated plan, flying blind despite making good money. Lack of financial advisory - knows/feels they need help on this area.
Goals	Retirement, tax reduction, protection of what they have built, legacy.
Concerns	Inflation, market losses, what happens to the business if something happens to them.

Who We Do Not Serve

Clarity about who Pinnacle Planning does not serve is as important as clarity about who it does. The following are not the right fit:

- Pure W2 employees or C-suite executives without a business entity
- People who are not coachable or not willing to be guided
- People who do not believe in paying for professional advisory services
- Businesses generating less than \$500K in revenue
- Anyone who does not fit the profile is referred back to M&M Wealth Associates

The messaging Pinnacle Planning puts into the world should attract the clients we want, not just the clients we can help. The goal is for a business owner to encounter Pinnacle Planning content and immediately think: these people help people like me.

Part 4: Our Tool belt

Phone or Zoom for first discovery call

Zoom, Google Slide Google sheet to present our products and services

Right Capital <https://www.rightcapital.com/> (Intuitive planning tools for modern financial advisors) as the financial planning tool to help customer understand their financial landscape and for us to confirm our proposals.

Part 5: Individual Meeting Components

For each of the client meeting, we would like to

1. Establish the Objectives
2. Have an outline the Preparations
3. Have a concret Executions plan
4. Have A Summary and Follow ups

Part 6: The 4-meeting sales cycle

We limit our client acquisition to 4 meetings

1. First meeting Introduction and Discovery

- Info gathering
- Intro and how we work
- Objection summaries
- Follow-up reminders
- Gather and understand Possible pain points
- Relevant use cases
- Understand their current financial advising methods and contacts (CPA, financial advisor, banks...)
- Gather enough info to preliminarily populate Right Capital
 - Family
 - Income
 - Savings
 - Expenses
 - Goals
 - Net Worth: Bank, Loans, Investments, Properties, and Other Assets
 - Businesses
 - Real Estate holdings
- We need:
 - Recommended clear meeting goal
 - **Suggested discovery questions**
 - **Preparation steps**
 - **Recommended execution**

- Suggestion for the 4 components in Part 5 above

2. Financial Landscape Confirmation & Preliminary Goal Assessment

- Present preliminary Right Capital plan
- Confirm and update the plan
- Present initial proposal
- Change proposal with new info in Right Capital plan
- Next-step fields
- Objection summaries
- Follow-up reminders
- Internal handoff notes
- We need:
 - Recommended clear meeting goal
 - **Suggested discovery questions**
 - **Preparation steps**
 - **Recommended execution**
 - Suggestion for the 4 components in Part 5 above

3. Proposal, Objection Handling and How to move forward

- Present final Right Capital plan
- Objection management
- Follow-up reminders
- Internal handoff notes
- We need:
 - Recommended clear meeting goal
 - **Suggested discovery questions**
 - **Preparation steps**

- **Recommended execution**
- Suggestion for the 4 components in Part 5 above

4. Conclusion: Go or No Go

- Present final Right Capital plan
- Objection management
- Finalize decision
- We need:
 - Recommended clear meeting goal
 - **Suggested discovery questions**
 - **Preparation steps**
 - **Recommended execution**
 - Suggestion for the 4 components in Part 5 above
